Questionnaire Block 1

Question 1
Briefly describe the strategy that you used in this block.

when I picked a number as a suggestion, i would either skip 1 or 3 numbers so I would by higher than the other player, when they picked a suggestion i would go 1 or 3 higher than their suggestion

Question 2
What did you think of the other player's strategy? Briefly describe their strategy as well.

the other player would try to go and use the same strategy as me. but occasionally mix it up by skippin 2 nombers

Question 3
How would you rate the cooperativeness of the other player?

1	2	3	4	5
O	⊗	O	O	O
uncooperative		neutral		cooperative

Question 4
How would you rate the competitiveness of the other player?

1	2	3	4	5
O	O	O	⊗	O
uncompetitive		neutral		competitive

Question 5
How competent was the other player at the Mod-Signal Game?

| 1	2	3	4	5
O	O	O	O	⊗
incompetent		neutral		competent

Question 6
Would you want to play with this player again? Explain briefly.

yes, even thopogh I lost points wise we were very eaual througout the game and I enjoyed trying to predight which number they would pick
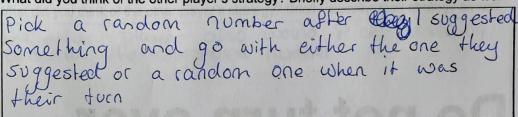

Questionnaire Block 2

Question 1
Briefly describe the strategy that you used in this block.

if the other player suggested something i would Pick the number above that. If i suggested something I would pick a random number next

Question 2
What did you think of the other player's strategy? Briefly describe their strategy as well.

Pick a random number after they I suggested Something and go with either the one they suggested or a random one when it was their turn

Question 3
How would you rate the cooperativeness of the other player?

1	2	3	4	5
O	⊗	O	O	O
uncooperative		neutral		cooperative

Question 4
How would you rate the competitiveness of the other player?

1	2	3	4	5
O	O	⊗	O	O
uncompetitive		neutral		competitive

Question 5
How competent was the other player at the Mod-Signal Game?

1	2	3	4	5
O	O	⊗	O	O
incompetent		neutral		competent

Question 6
Would you want to play with this player again? Explain briefly.

no, it was too much guess work and not much logical thinking

Questionnaire Block 3

Question 1
Briefly describe the strategy that you used in this block.

> when the number was suggested i would Pick a number that was somewhere around there either above or below the suggested number and trying the same combinations multiple times

Question 2
What did you think of the other player's strategy? Briefly describe their strategy as well.

> the other player also would Pick something around the suggested number

Question 3
How would you rate the cooperativeness of the other player?

1	2	3.	4	5
O	O	O	⊗	O

uncooperative   neutral   cooperative

Question 4
How would you rate the competitiveness of the other player?

1	2	3	4	5
O	O	O	⊗	O

uncompetitive   neutral   competitive

Question 5
How competent was the other player at the Mod-Signal Game?

1	2	3	4	5
O	O	O	⊗	O

incompetent   neutral   competent

Question 6
Would you want to play with this player again? Explain briefly.

> yes, it was not completely random and had some thought to it but it still had an element of luck to it

You can now turn over the last questionnaire (general questionnaire) on the table.

General Questionnaire

Question 1

What is your age, sex and what are you studying?

22 Female   studying bsc Computing Science

Question 2

Were the instructions provided at the start sufficient enough to understand the game? If not, were the trials enough to get a proper understanding of the game?

yes the instructions were enough to understand the game, the trials gave a visual aide

Question 3

What was your mood like today?

overall happy and content

Question 4

Did you have any prior knowledge of the Mod Game before the start of the experiment?

No

Don't forget to answer the questions on the other side of the paper!

Question 5

Did you know any of the other participants that you played with in the session before the start of the experiment?

yes, I know both of them

Question 6

Some of our participants have played the Mod-Game with a computer partner rather than a human partner in some of the blocks.

For each block give a percentage on how confident you are that you played with a human partner in that block and briefly explain why. (e.g. Block 1: 100%, you are completely certain that you played with a human partner)

Block 1:

80% certain I played with a human partner

Block 2:

85% certain I played with a computer partner

Block 3:

75% certain I played with a human partner

P-beauty contest

All participants will do this contest. The winner gets a Tony's Chocolonely chocolate bar of their choice! Mark the number that you think will be the average of the numbers chosen by all participants, divided by 3 and multiplied by 2.(take ⅔ of the number you think will be the average of the numbers chosen by all participants, e.g. if you think 90 will be the average of the numbers chosen by all participants, you mark 60)

```
0      10      20      30      40      50      60      70      80      90      100
