Questionnaire Block 1

Question 1
Briefly describe the strategy that you used in this block.

The first few rounds I tried to understand ~~my of~~ the other player's strategy. This seemed impossible so I just ~~gue~~ picked the number I signaled a few times after which it was sort of a guessing game of how many numbers the other player would skip.

Question 2
What did you think of the other player's strategy? Briefly describe their strategy as well.

No strategy in the first few rounds and similar to mine - trying to guess how many steps 'ahead' the other player would pick ahead of their signal.

Question 3
How would you rate the cooperativeness of the other player?

1	2	3	4	5
O	◉	O	O	O

uncooperative   neutral   cooperative

Question 4
How would you rate the competitiveness of the other player?

1	2	3	4	5
O	O	◉	O	O

uncompetitive   neutral   competitive

Question 5
How competent was the other player at the Mod-Signal Game?

1	2	3	4	5
O	O	◉	O	O

incompetent   neutral   competent

Question 6
Would you want to play with this player again? Explain briefly.

I feel like they understand the game properly now so it would be fun to see if either of us scored higher.

Questionnaire Block 2

Question 1
Briefly describe the strategy that you used in this block.

I spent the first few rounds prch trying to confuse my opponent with a strange strategy, to try and get them to play into my hand and then score some points later when they started playing 'my' game. (signal 6, picks)
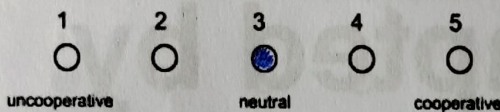

Question 2
What did you think of the other player's strategy? Briefly describe their strategy as well.

They tried the (probably) superior safer strategy of picking ahead of their signal most rounds.
After a few rounds I think this is sort of basic

Question 3
How would you rate the cooperativeness of the other player?

1	2	3	4	5
O	O	●	O	O
uncooperative		neutral		cooperative

Question 4
How would you rate the competitiveness of the other player?

1	2	3	4	5
O	O	O	●	O
uncompetitive		neutral		competitive

Question 5
How competent was the other player at the Mod-Signal Game?

1	2	3	4	5
O	O	●	O	O
incompetent		neutral		competent

Question 6
Would you want to play with this player again? Explain briefly.

It is possible they would change their strategy if they knew they'd play with me again, which would be interesting.

Questionnaire Block 3

Question 1
Briefly describe the strategy that you used in this block.

No strategy, just picking my signal - waiting to see if the other player would betray me (which they did)
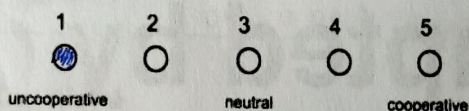

Question 2
What did you think of the other player's strategy? Briefly describe their strategy as well.

Valid strategy, waiting for an opportune moment to get 1 up on me,. and not really showing any strategy until late in the game
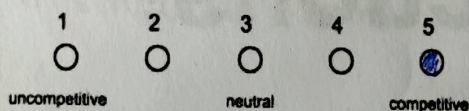

Question 3
How would you rate the cooperativeness of the other player?

1	2	3	4	5
●	○	○	○	○
uncooperative		neutral		cooperative

Question 4
How would you rate the competitiveness of the other player?

1	2	3	4	5
○	○	○	○	●
uncompetitive		neutral		competitive

Question 5
How competent was the other player at the Mod-Signal Game?

1	2	3	4	5
○	○	○	●	○
incompetent		neutral		competent

Question 6
Would you want to play with this player again? Explain briefly.

Yes, they would not be able to beat me the same way again.

You can now turn over the last questionnaire (general questionnaire) on the table.

General Questionnaire

Question 1
What is your age, sex and what are you studying?

23, male

Studying Business IT and Management

Question 2
Were the instructions provided at the start sufficient enough to understand the game? If not, were the trials enough to get a proper understanding of the game?

Almost. I lost one point in I think the very first round because I didn't fully understand the practice rounds. vs. a real player

Question 3
What was your mood like today?

Mischeavous, calm.

Question 4
Did you have any prior knowledge of the Mod Game before the start of the experiment?

None.

Don't forget to answer the questions on the other side of the paper!

Question 5

Did you know any of the other participants that you played with in the session before the start of the experiment?

I haven't gotten a good look at anyone.
If Denny Verbeek is present today, then yes.

Question 6

Some of our participants have played the Mod-Game with a computer partner rather than a human partner in some of the blocks.

For each block give a percentage on how confident you are that you played with a human partner in that block and briefly explain why. (e.g. Block 1: 100%, you are completely certain that you played with a human partner)

Block 1:

I think they were human as the first few rounds were non sensical to me - a computer that understands the game wouldn't play useless moves I think

Block 2:

I have no idea if this was a player or not.

Block 3:

Because I heard mouse clicks that seemed to line up with my game... I think it was a person

P-beauty contest

All participants will do this contest. The winner gets a Tony's Chocolonely chocolate bar of their choice! Mark the number that you think will be the average of the numbers chosen by all participants, divided by 3 and multiplied by 2.(take ⅔ of the number you think will be the average of the numbers chosen by all participants, e.g. if you think 90 will be the average of the numbers chosen by all participants, you mark 60)

0   10   20   30   40   (50)   60   70   80   90   100
